STÄUBLI ELECTRICAL CONNECTORS

Long-term solutions – Expert connections

Stäubli Electrical Connectors is a leading international manufacturer of high-quality electrical contacts and connector systems and solutions for industrial applications. We are part of the Stäubli mechatronics group, the technology leader in connection solutions, robotics and textile machinery.

Stäubli develops, produces, sells and services products for markets with the highest productivity and safety standards. As recognized specialists, our focus is always on solutions and customers. Many new developments got their start here and are now becoming established as worldwide standards.

Our customers depend on our expertise and our active support, even when dealing with unusual challenges. With Stäubli, you're entering into a long-term partnership built on reliability, dedication, and exceptional quality in both products and services.

Pioneering contact technology for increased efficiency

The entire Stäubli Electrical Connectors product range meets market expectations for high performance, the highest number of mating cycles, and long-lasting reliability for safe, durable operation. Our proven **MULTILAM** technology is ideal for all types of connections in industrial applications. Customers in the **power transmission and**

distribution sector rely on our consistent, loss-free transmission performance in all voltage ranges. The **automotive industry** depends on our high-efficiency connections for spot-welding applications in production lines. Harsh conditions in the **transportation sector** require high vibration resistance, maximum reliability, and compact design. These attributes are vitally important for railway and e-mobility applications. The safety

and reliability of our products are essential for **test and measurement technology**. In the growing field of **alternative energy**, our products have been setting standards since the 1990s. About half of the solar energy generated worldwide is transmitted through safe, long-lasting, high-performance Stäubli connectors.

Applications and advantages

This catalog presents our wide range of touch-protected testing accessories in accordance to IEC/EN 61010-031. Alongside accessories for service technicians in repair workshops, etc. (CAT II), this catalog also includes testing accessories for electricians and power company

employees (CAT III and CAT IV) as well our 30 V AC / 60 V DC program (O). The testing accessories program is complete with secure connection sockets for testing and measurement equipment in accordance with IEC/EN 61010-1.

Further information concerning product portfolio, special features as well as exemplary videos can be found at

UNLIMITED POSSIBILITIES FOR CONTACT SOLUTIONS

MULTILAM Technology

MULTILAM are specially formed and resilient contact elements. All Stäubli Electrical Connectors products benefit from the unique and outstanding performance of the MULTILAM Technology.

Thanks to their constant spring pressure, MULTILAM louvers ensure continuous contact with the contact surface, resulting in a constantly low contact resistance.

MULTILAM Technology allows to find solutions for connectors within the severest constraints and in certain products for up to 1 million mating cycles.

This makes the MULTILAM Technology the best choice for applications with demanding requirements:

- Reliable and longlife operation due to constantly high performance
- Safe operation under highest environmental demands on temperature, vibration and shock
- Suitable for data and signal contacts as well as high-current connectors
- Automated solutions with a high number of mating cycles

General information

Length and color code

For items that are available in more than one color or lead length, write the desired lengths and color codes after the order number instead of the spaces and * used in the catalog.

| | | | |
|-----------|--------------|-------------|-------------|
| 20 | green-yellow | 26 | violet |
| 21 | black | 27 | brown |
| 22 | red | 28 | grey |
| 23 | blue | 29 | white |
| 24 | yellow | [33] | transparent |
| 25 | green | | |

Lead length

The lead length of all standard leads in this catalog refers to the visible length of the cable.

Standard items

The colors specified in the catalog or color/length combinations are available as standard items without minimum order quantity.

Variants

Optional colors

The catalog also indicates optional colors in addition to standard colors for the various items.

These color variants can be order starting from 100 pieces.

Optional lengths

You can order 10 to 100 pieces depending on the product if your application requires a non-standard measurement lead.

Feel free to contact us regarding the prerequisites and availability.

Special items

As a provider of customized solutions, Stäubli Electrical Connectors also offers color combinations not listed in the catalog. Upon request, we are happy to inform you of prices, delivery times and minimum order quantities for special items.

Changes/provisos

All data, illustrations, and drawings in the catalog have been carefully checked. They are in accordance with our experience to date, but no responsibility can be accepted for errors. We also reserve the right to make modifications for design and safety reasons. When designing equipment incorporating our components, it is therefore advisable not to rely solely on the data in the catalog but to consult us to make sure this information is up to date. We shall be pleased to advise you.

Copyright

The use of this catalog for any other purpose, in whatever form, without our prior written consent is not permitted.

Measurement categories according to IEC/EN 61010-031

To facilitate the assignment of test accessories to the appropriate applications, standard IEC/EN 61010-031 has established a number of categories which define where they can be used in the power supply network and to lay down appropriate requirements for each category.

Formerly (until 2002), the measurement categories now defined in standard IEC/EN 61010-031 were designated as overvoltage categories. This term originated from the

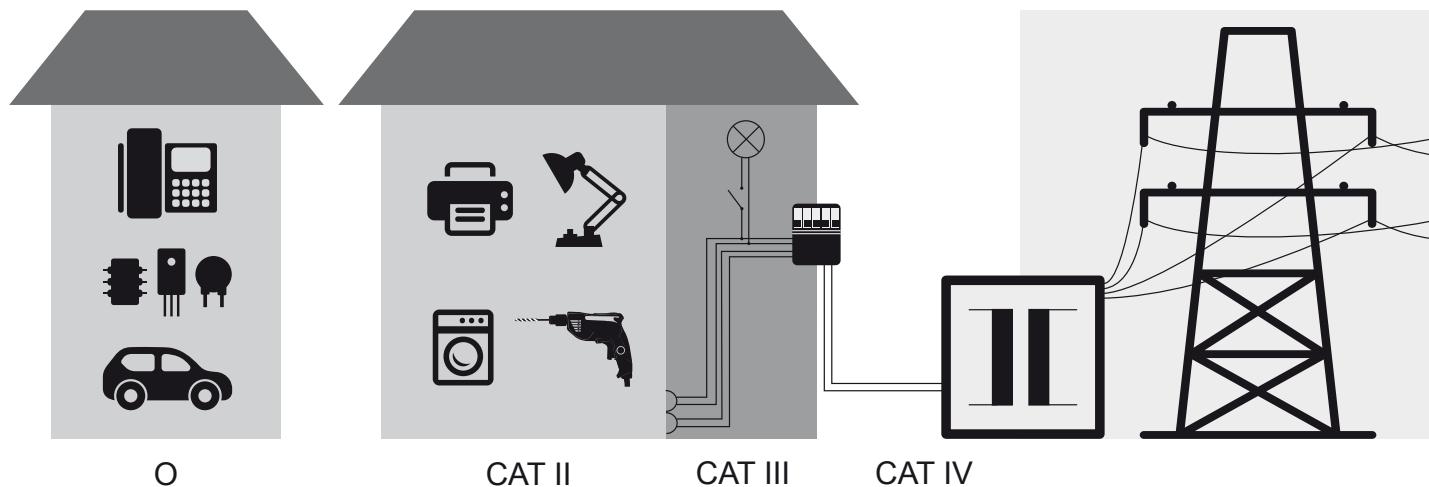

fact that the classification was based primarily upon the overvoltages (surges) that were likely to occur in the power grid.

Actually the measurement categories differ not so much in the level of the expected transient values as with regard to the available energy in each test category in the event of a short circuit.

In a higher measurement category more energy can be released than in a lower one, with results that may even have an explosive-like character with very serious consequences for the user.

Standard IEC/EN 61010-031 has various measurement categories, abbreviated to "CAT". The declared CAT category followed by a number is given in our catalogs with the rated voltage, and on the products.

As a general rule, the higher the CAT rating, the higher the safety requirement that applies to the product.

O Other circuits that are not directly connected to mains.

CAT II applies to measurements on equipment that is connected to the grid or supplied from the grid without constituting a part of the grid installation.

CAT III applies to measurements inside the house or building installation.

CAT IV applies to measurements at the supply source of the installation (input side).

Panel-mount socket LB-IF2R

Insulated, Ø 2 mm, with spring-loaded MULTILAM. Machined brass. Metal thread jacket on the insulation. The socket can be screw-mounted in predrilled panels.

Connection: Flat connecting tab 2.8 mm x 0.8 mm.

| Order No. | Type | Rated voltage/current | | *Standard colors |

Also available under order No. 23.0020-*
with round nut MUR/M6x0,5 (Tube spanner:
SS2).

Socket strip BL2-.../20...

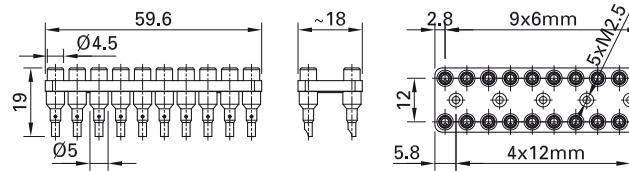

20-pole socket strips, consisting of 2 rows of 10 rigid sockets with solder connection. No need for individual mounting of sockets: Simplified panel drilling, orientation of solder

connections and compact mounting with only 5 screws. Available with socket spacings of 6 mm and 12 mm.

Our Ø 2 mm connecting plugs KS2-... are equipped with the tried and tested MULTILAM, and make a vibration-proof contact. Together with the socket strips BL2-... (page 26), they are ideally suited

for the saving of space in applications such as panels for testing and servicing in the aviation industry. The gold-plated versions offer a very low contact resistance and extremely high resistance to corrosion.

Optional colors 23 24 25 28 29

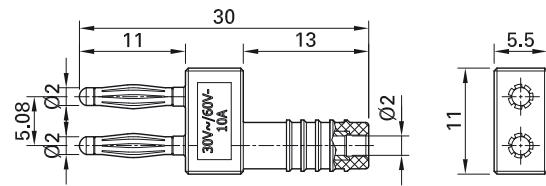

Further information, page 6

Connecting plug KS2-...

Insulated, Ø 2 mm, made of brass. Equipped with spring-loaded MULTILAM to ensure vibration-proof contacts – ideal, for instance, in the automotive field for test drives and

servicing. Ø 2 mm rigid socket in insulator accepting spring-loaded Ø 2 mm plugs with rigid insulating sleeve.

Fused test lead XSM...-419

The test leads with integrated high breaking capacity fuses are designed for 1000 V, CAT IV in accordance with IEC/EN 61010-031 and allow for the use of Ø 4 mm standard safety probes and test clips for fuse-protected measurements. To change the fuse, the two-part fused connector can be easily unscrewed.

Highly flexible, with insulation in PVC or silicone. With in-line Ø 4 mm MULTILAM plug with rigid insulating sleeve on both ends. The two-part screw connector accepts a high breaking capacity fuse measuring 6.3 x 32 mm.

The fuse is not supplied.

User configurable plugs and sockets

This section contains plugs and sockets for self-assembled test leads. The information about each item includes details regard-

ing connectable conductor cross-sections and diameters, as well as regarding the available assembly instructions.

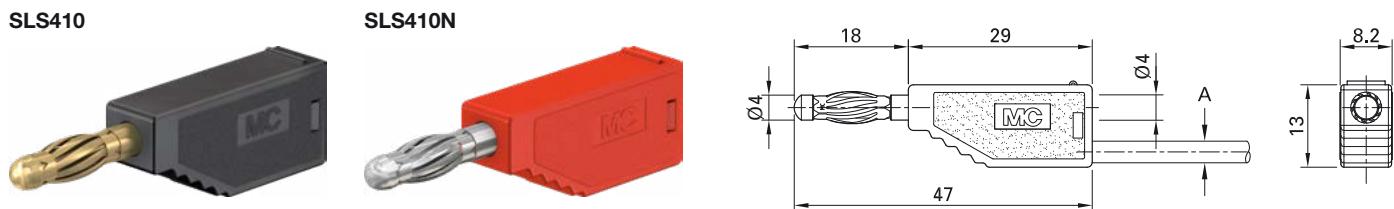

In the production of our test leads we use only high-quality multi-stranded cables of our own production. If you are interested in

our full range of stranded cables, please ask for a copy of our main catalog "Cables and Multistrand Wires".

| Order No. | Type | Fuse rating | Dimensions | Breaking capacity | |
|-----------|----------|-------------|-------------|------------------------------|--|
| 69.0011 | FLU-11 | 11 A | 10 x 38 mm | 20 kA (AC 1000 V, DC 1000 V) | |
| 69.0012 | DMI-0,5A | 0.5 A | 6.3 x 32 mm | 30 kA (AC 1000 V, DC 1000 V) | |
| 69.0013 | DMI-1,6A | 1.6 A | 6.3 x 32 mm | 30 kA (AC 1000 V, DC 1000 V) | |

Test lead holders LKW2-N

Trolley made of anodized aluminum square section tube for orderly storage of test leads. 2 lead holders (length: 50 cm), each with 34 plastic brackets. For efficient packing, the

trolley is supplied disassembled.

The test leads are not supplied!

| Order No. | Type |
|-----------|--------|
| 64.9284 | LKW2-N |

Test lead holders MH-1/330

Holder for orderly storage of test leads. C-profile rails can be used as a carrier for hanger modules MPK-10. Integral spacers maintain a set spacing of 4 mm. When necessary, the spacers can be taken away

easily to store leads with smaller diameters. For thicker leads, the holders can be moved accordingly in the C-profile rail.

MH-1/330

| Order No. | Type | Length | Number of hangers |
|-------------|----------|--------|-------------------|
| 64.9244-033 | MH-1/330 | 33 cm | 21 |
