i-Powers for a diverse range of products from reputable manufacturers who are leaders in their field and have long, stable corporate backgrounds. Our solutions are considered in the industry as "best-in-class" and we are privileged to have supported over 1,800 MW of solar projects in Taiwan across the residential, commercial and large scale segments.

Product Type

Renewable Energy

Mitigate power loss, downtimes, service hours, risk of fire of your PV-System by using the Original MC4 and MC4-Evo 2 connectors. The unique MULTILAM contact technology will guarantee excellent long-term reliability and a low contact resistance over the entire product life.

Passion for sustainable energy

Every year we deliver more than 50 million meters of PV cables for connecting solar panels, inverters, combiner boxes and other PV harness applications around the world.
