| P27                 | Z3 |  | 1500V DC 35A/40A | Ø 3.4 | 三芯/四芯 3C/4C | 嵌入式 Snap-in | -40~+85°C | IP 68 (1m,1h) |
| P28                 | Z3 |  | 1500V DC 35A/40A | Ø 3.4 | 三芯/四芯 3C/4C | 嵌入式 Snap-in | -40~+85°C | IP 68 (1m,1h) |

| Junction system 连接线 |      |  |                    |     |       |             |           |               |
|---------------------|------|--|--------------------|-----|-------|-------------|-----------|---------------|
| P29                 | Z2   |  | 1500V DC 12A       | Ø 4 | MC4   | 嵌入式 Snap-in | -40~+85°C | IP 68 (1m,1h) |
| P30                 | ZT-1 |  | 600V AC(UL) 20A/7A | Ø 4 | 三芯 3C | 嵌入式 Snap-in | -40~+85°C | IP 68 (1m,1h) |

#### P32-P32 光伏线缆 PV Cable

#### P33-P34 工具及附件 Tools and accessories

#### P35-P36 车间设备 Facilities

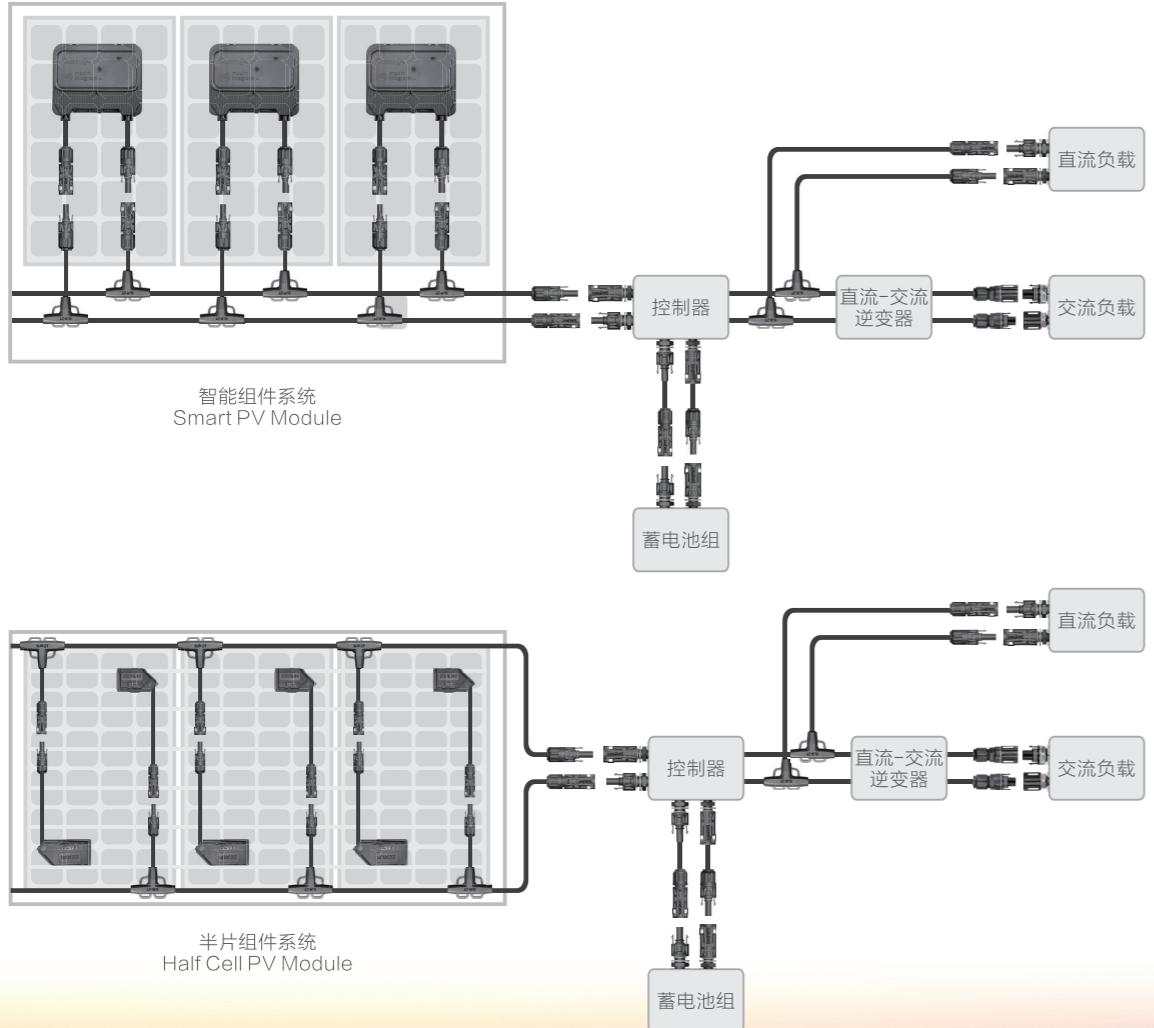

#### P37-P38 公司六大优势 Company Advantages

- (1) 有些情况下，认证无法写明或者认证正在进行中，对应页面会有详细说明。  
 Certifications are in some cases limited to specific types or still pending. Details are given on the relevant product pages.  
 (2) 对应产品的额定电流也可通过改变二极管以满足客户要求。  
 Available equipped with alternative bypass diode, on inquiry.

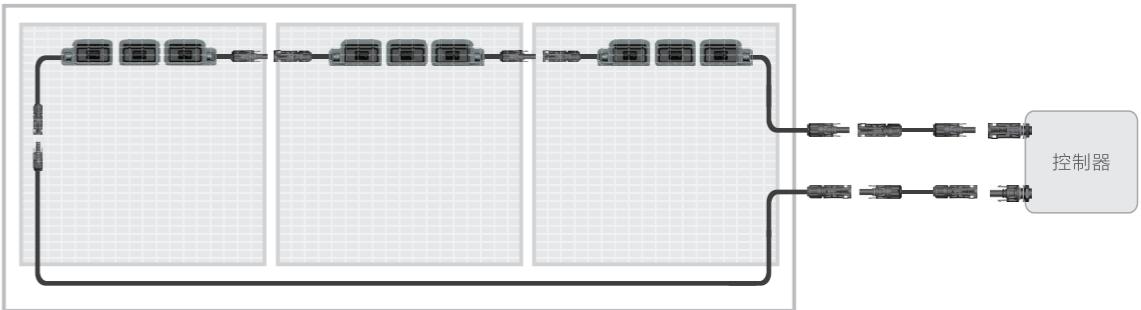

# PRODUCT APPLICATION

## 产品应用

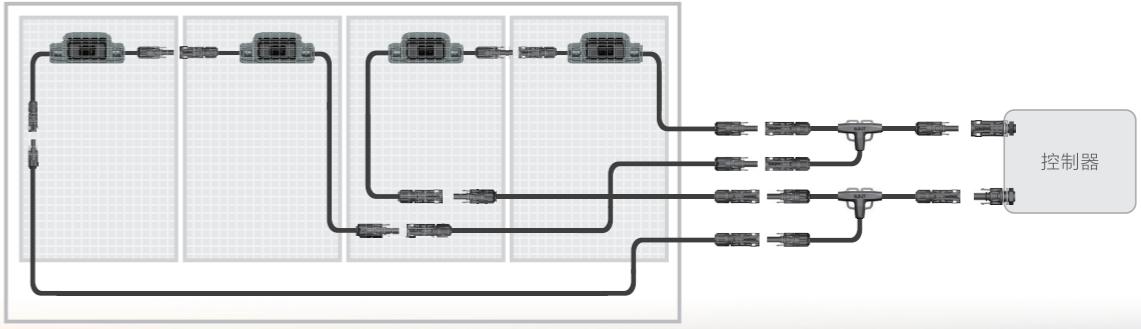

晶硅发电系统 Crystalline Silicon Module System

双玻组件发电系统 Double-Glass Module System

薄膜发电系统 Thin-Film Module System

# SOLAR CELL OPTIMIZERS

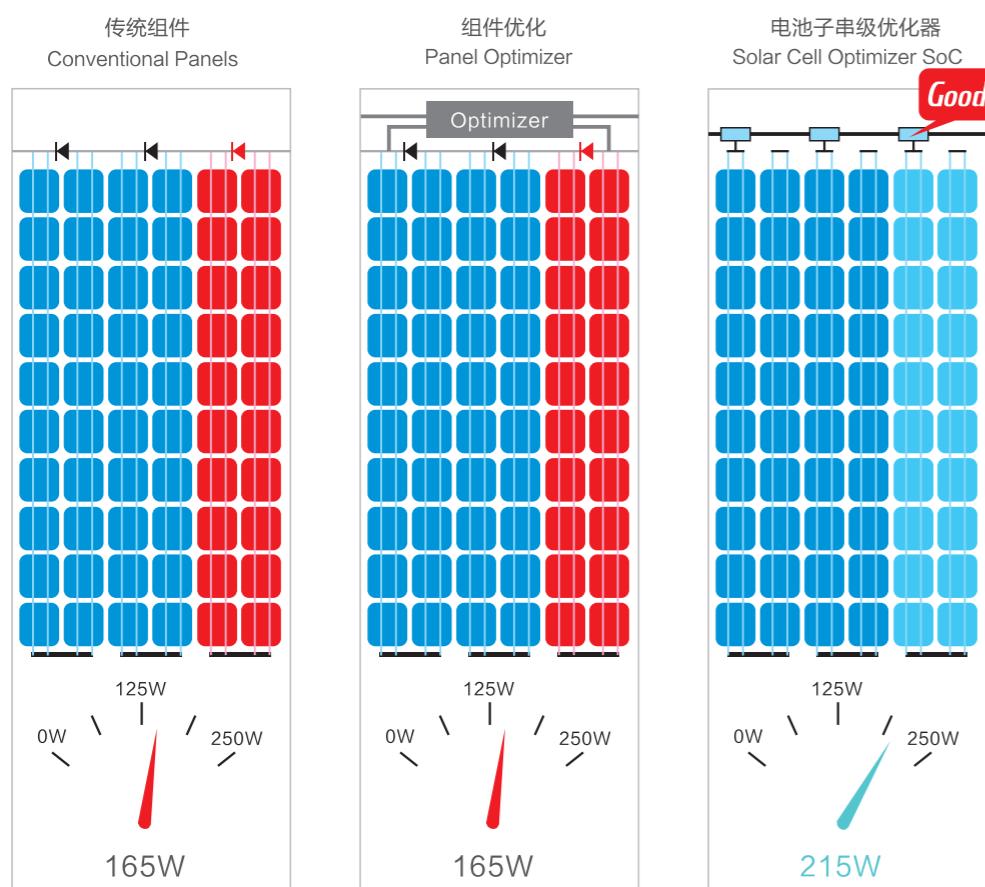

智能优化器

## 基于电池子串的优化优势

### Benefits of Cell-String-Level Optimization

- 提高系统发电量。对每串(6至24节)电池独立进行MPPT，最大程度地消除板间性能不匹配。
- 扩展系统规模。板间遮挡性能的改进，允许提高地面覆盖或屋顶覆盖的组件安装密度，进而提高有限空间的系统发电量。
- 更高可靠性。利用电池子串级优化器代替传统连线盒的旁路二极管，消除了热斑及相关故障隐患，即使有电池片遭到极度弱化也仅仅影响其所在电池串，不会影响整个组件。
- 最低的成本。全集成方案的成本低于市场上现有的直流优化器模块，并且无需附加硬件、定制逆变器或数据服务。

- Increased Energy Harvest. Performing MPPT separately on each cell string (from 6 to 24 cells) eliminates performance mismatch at the most granular level.
- Expanded System Size. Improved performance with row-to-row shading allows you to increase ground coverage or roof-top energy density, so you can generate more energy from a constrained space.
- Extended Reliability. Optimizer SoCs replace the bypass diodes normally connected to panel strings, eliminating hot spots and associated failure mechanisms. Now the weakest cell only degrades its local cell-string, rather than the entire module.
- Lowest Solution Cost. Fully integrated solution costs less than DC optimizer modules, and requires no additional hardware, specialized inverters, or data services.

## 太阳能子串级优化器的显著优势

### The Benefits of Solar Cell Optimizer SoCs Really Add Up

| 性能优势<br>Performance Benefit   | 传统组件<br>Conventional Panels | 组件优化<br>Panel Optimizer | 电池子串级优化器<br>Solar Cell Optimizer SoC |
|---|-----------------------------|-------------------------|--------------------------------------|
| 提高能量收集 Increased Energy Harvest   |                             |                         | Good!                                |
| 板间失配 Panel-to-panel mismatch  |                             | ✓                       | ✓                                    |
| 组件内部失配（阴影、灰尘等） Mismatch within the panel(shadow, soiling, etc.)             |                             |                         | ✓                                    |
| 消除热斑效应 Elimination of hot spots   |                             |                         | ✓                                    |
| 扩展系统规模 Expanded System Size   |                             |                         |                                      |
| 组件布置可以更接近遮挡物 Panel insertions closer to shading objects                     |                             | ✓                       | ✓                                    |
| 高GCR阵列，无性能损失 High GCR arrays without performance penalty                    |                             |                         | ✓                                    |
| 降低功耗 Reduced Power Dissipation  |                             |                         |                                      |
| 板间失配 Panel-to-panel mismatch  |                             | ✓                       | ✓                                    |
| 组件内部失配（老化、PID、破裂的电池片） Mismatch within the panel (aging, PID, cracked cells) |                             |                         | ✓                                    |
| 高可靠性方案 High-Reliability Solution  |                             |                         |                                      |
| 不受旁路二极管故障影响 Immune to bypass diode failure                                  |                             |                         | ✓                                    |
| 极少的元件数量/电子器件 Low component count electronics                                | ✓                           |                         | ✓                                    |
| 最低成本方案 Lowest Cost Solution   |                             |                         |                                      |
| 组件成本增加 Panel Adder  |                             |                         | 10¢–20¢/W                            |
| 系统成本增加 System Adders  |                             |                         | 10¢–20¢/W                            |
| 总成本增加 Total Cost Adder  |                             |                         | 20¢–40¢/W                            |
|   |                             |                         | 5¢/W                                 |

# SOLAR CELL OPTIMIZERS APPLICATION

## 智能优化器应用案例

屋顶阴影遮挡 Challenged Rooftop

Residence in Branson, MO - 8.6kW system with tree shading issues

受空间限制的商用屋顶 Commercial Rooftop with Limited Space

Farmers Park business complex in Springfield, MO - 30.6kW system

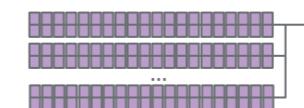

扩容的地面上电站 Utility Project with Longer String

4.8MW utility project in Chilamurra, QLD, Australia

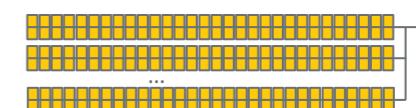

## LONGER STRINGS 扩展系统规模

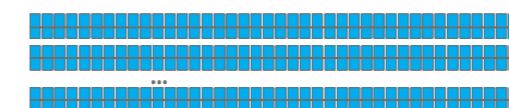

1000V 常规组件系统

- 每串20块组件
- 每兆瓦156串组件

1500V 常规组件系统

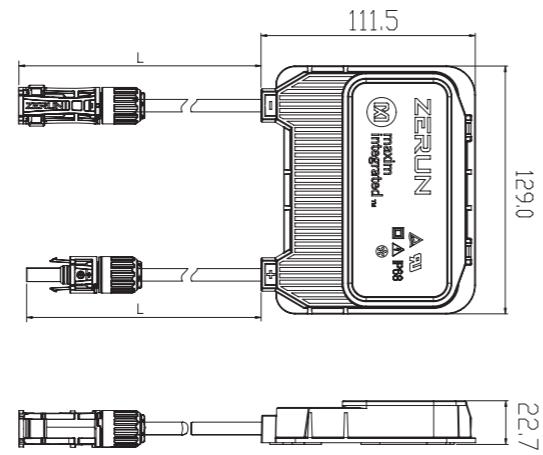

- 每串30块组件
- 每兆瓦104串组件

1500V 美信优化器组件系统

- 每串42块组件
- 每兆瓦70串组件

- Maxim optimizers limit the maximum voltage output of the PV module
- Enables 40% more modules per string while remaining under the 1500V safety limit
- Longer DC strings enable low cost inverters, lower installation capex, and less DC losses

### 革命性的电池子串级光伏智能优化控制器

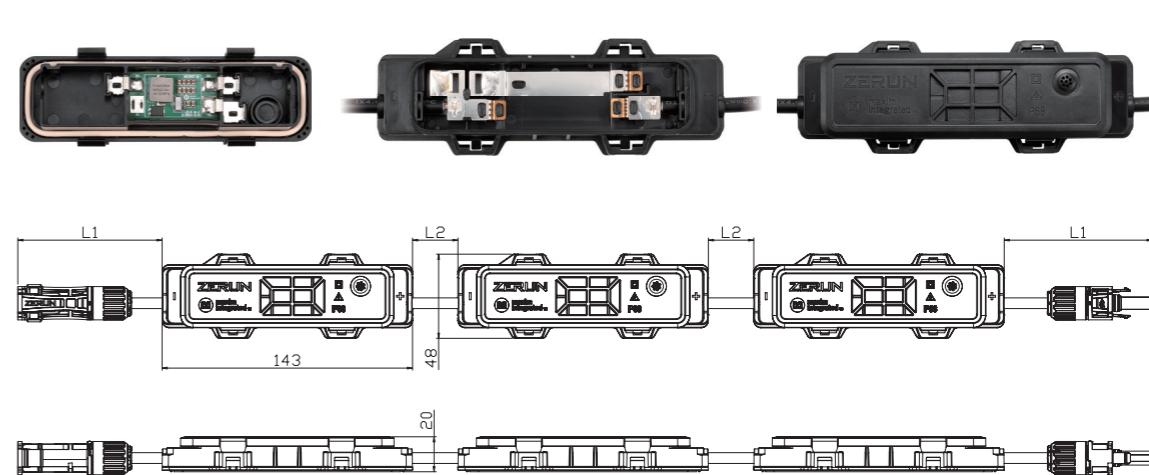

#### Solar Cell Optimizer with Revolutionary Cell-string-level MPPT and DC optimization

ZS智能优化控制器，是由全球知名的半导体集成解决方案供应商Maxim integrated与泽润电子共同开发。利用太阳能电池子串级优化器，可在每串电池上进行MPPT和直流优化,通过消除所有的电池板内部及电池板间的不匹配，如阵列之间的阴影遮挡、组件表面污染、电站周边障碍物阴影遮挡等，使得每串电池在同样环境条件下提供最大功率，从而提升发电量、实现密集的太阳能板布局，并提高系统可靠性。

ZS series Solar Cell Optimizer is co-developed by worldwide well-known IC solution provider Maxim Integrated and Zerun Electronics. With Solar Cell Optimizer SoCs you can perform MPPT and DC optimization on each cell string. This granularity minimizes power degradation due to row-to-row shading, soiling, and other sources of mismatch within the panel and string, it allows each cell string to deliver maximum power under the environmental conditions, enabling you to harvest more energy, achieve denser panel layouts, and improve system reliability.

| 技术参数      | Technical parameter             |   |
|-----------|---------------------------------|---|
| 系统额定电压    | Rated system voltage            | 1500V DC                                      |
| 额定电流      | Rated current                   | 12A   |
| 使用环境温度    | Operation temperature           | -40°C~+85°C                                   |
| 防护等级      | Degree of protection            | IP68(1m,1h)                                   |
| 连接器接触阻抗   | Contact resistance of connector | 0.25mΩ  |
| 导轨材质      | Rail material                   | Copper,tin plated 铜镀锡                         |
| 绝缘材料      | Insulation material             | PPE   |
| 防火等级      | Flame class                     | 5VA   |
| 认证 TUV UL | Certification TUV UL            | R50319467 2PfG 2305 E351403 UL3730 and UL1741 |

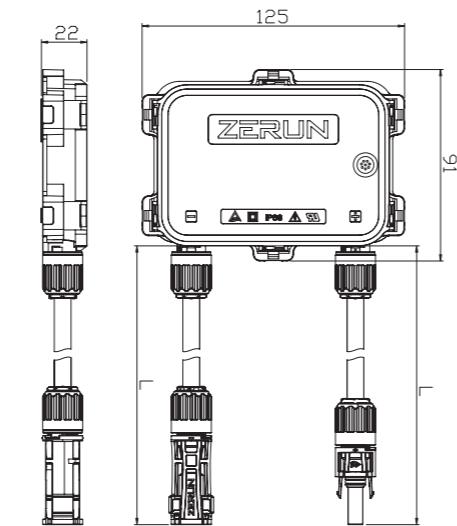

|         |  |                      |
|---------|--|----------------------|
| 导轨数量    | Number of bus ribbons                        | 6                    |
| 汇流带尺寸   | Bus ribbon size Max. width<br>Max. thickness | 8mm<br>0.3mm         |
| 汇流带连接方式 | Connecting of bus ribbons                    | Soldering 锡焊         |
| 密封方式    | Sealing type                                 | Potting compound 灌封胶 |

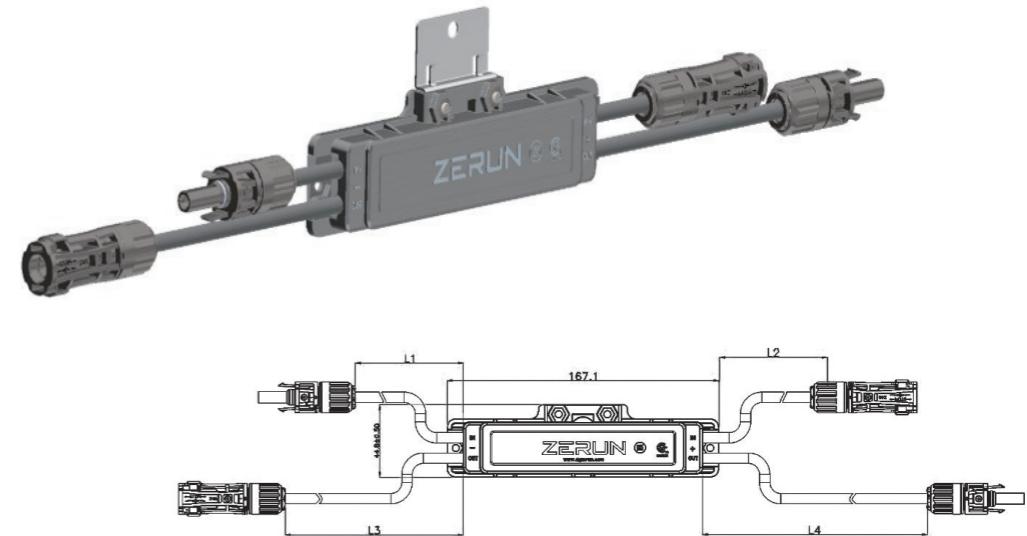

- 快速关断+智能优化组合，为组件提供安全高效解决方案；
- 优化器模块可更换，便于产品后续维护；
- 采用180度出线方式，可有效减少组件串联时所需线材，降低成本。
- Rapid shut down plus optimizer, safe&high efficiency solution for PV system.
- PCA Module replaceable, benefits maintaining.
- With cable outlet in line, shorter cable length is OK while wiring the panel.

- 快速关断+智能优化组合，为组件提供安全高效解决方案；
- 智能模块与传统模块可互换，组件系统设计可根据实际使用要求选用传统方案或智能方案。
- Rapid shut down plus optimizer, safe&high efficiency solution for PV system.
- Optional for smart solution or diode solution, benefits PV system design.

### 组件快速关断解决方案

#### PV Rapid Shutdown Solution

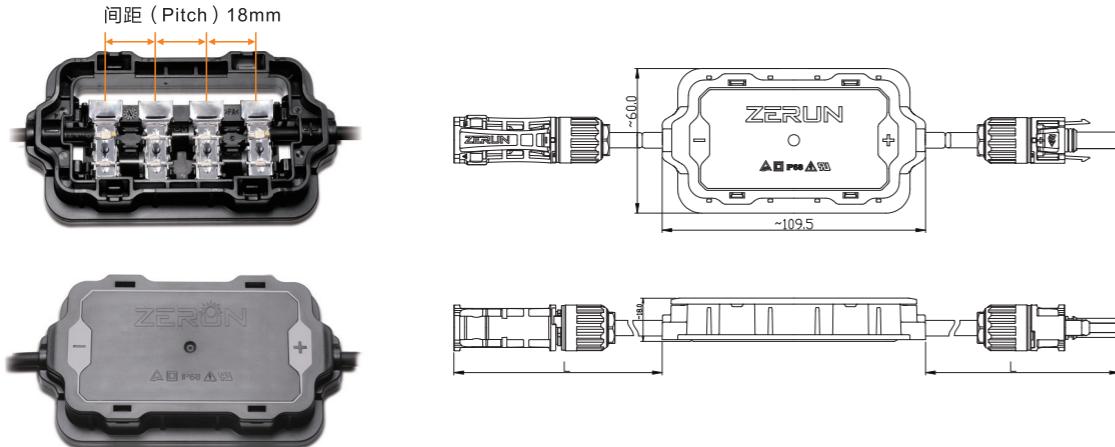

- 快速关断符合NEC690.12标准要求
- 组件级关断
- 过温保护
- 产品满足SunSpec通讯协议
- Meets NEC 690.12 rapid shutdown requirements
- Module-level deactivation
- Over-temperature protection
- SunSpec certificated

# JUNCTION BOX 接线盒

## Z7 Type I 全灌胶接线盒 Potting junction box

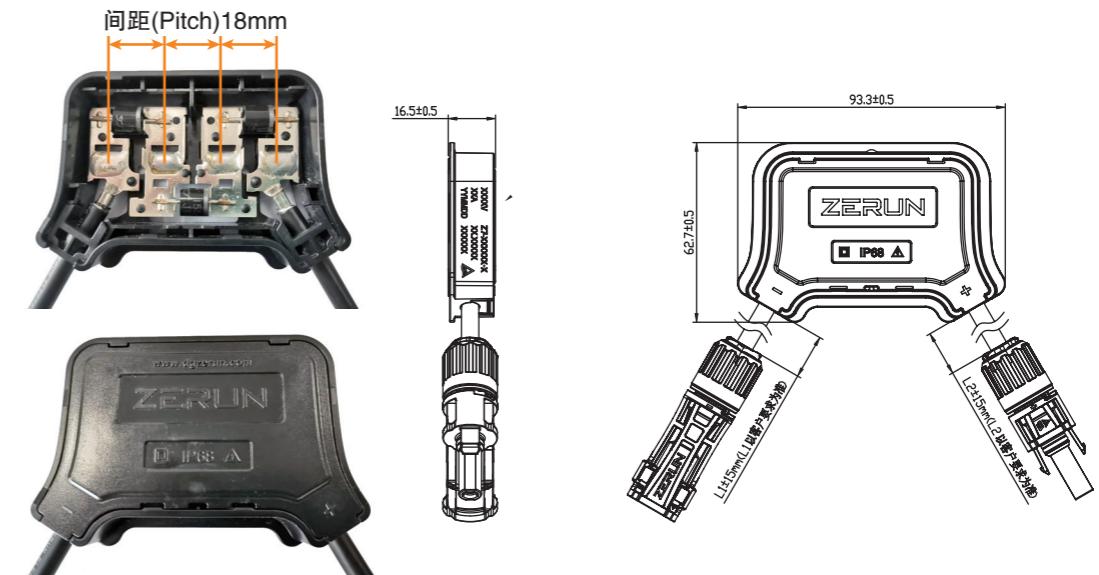

- 结构设计美观小巧，易于运输及组装；
- 采用180度出线方式，可有效减少组件串联时所需线材，降低成本；
- 整体及匹配连接器电性能优良，整体阻抗约 $10\text{m}\Omega$ (cable:1m&4mm $^2$ )，发热少，功耗低。
- Slim Size, easy for transportation after assembled onto module.
- With cable outlet in line, shorter cable length is OK while wiring the panel.
- Loop resistance  $\approx 10\text{m}\Omega$ (cable:1m&4mm $^2$ ), low heat generation, low power consume.

# JUNCTION BOX 接线盒

Z12

全灌胶接线盒  
Potting junction box

Z8 全灌封分体式接线盒  
Potting triple junction box

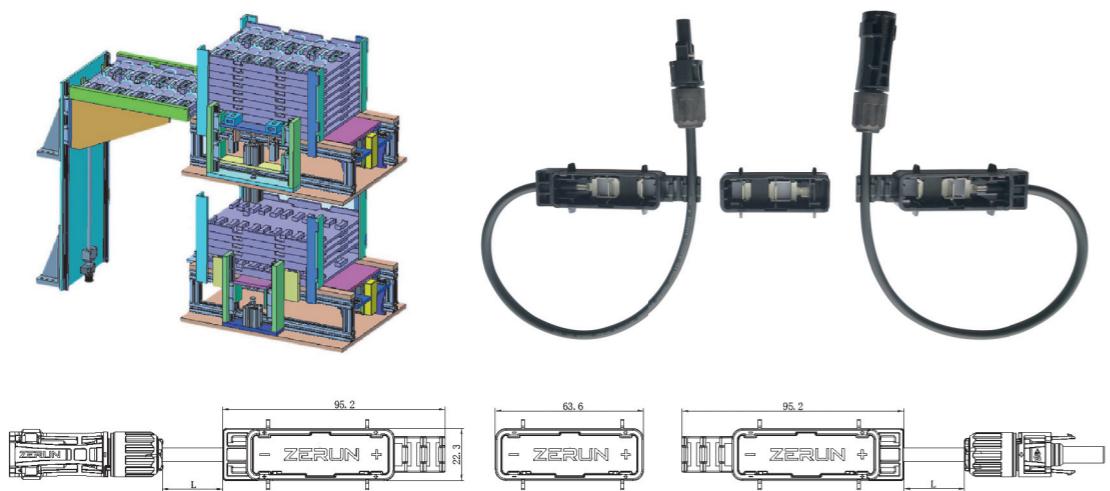

- 非灌胶接线盒，便于客户使用
- 卡接方式固定汇流条，简单可靠
- 整体及匹配连接器电性能优良，整体阻抗约 $10\text{m}\Omega$ (cable:1m&4mm $^2$ )，发热少，功耗低。
- Non-potting type, Simply panel assembly process
- Ribbon Clamping, easy but reliable method to fix ribbon
- Loop resistance  $\approx 10\text{m}\Omega$ (cable:1m&4mm $^2$ ), low heat generation, low power consume.

- 采用45度出线方式，可有效减少组件串联时所需线材，降低成本；
- 额定电流18A，适用于高效电池组件；
- 总灌胶量25ml，降低客户使用成本。
- With cable outlet in 45° , shorter cable length is OK while wiring the panel.
- Rated Current 18A, benefits for high efficiency PV module .
- Potting volume 25ml, Lower potting compound cost for panel maker .

# JUNCTION BOX 接线盒

Z8T 分体式接线盒  
Potting triple junction box

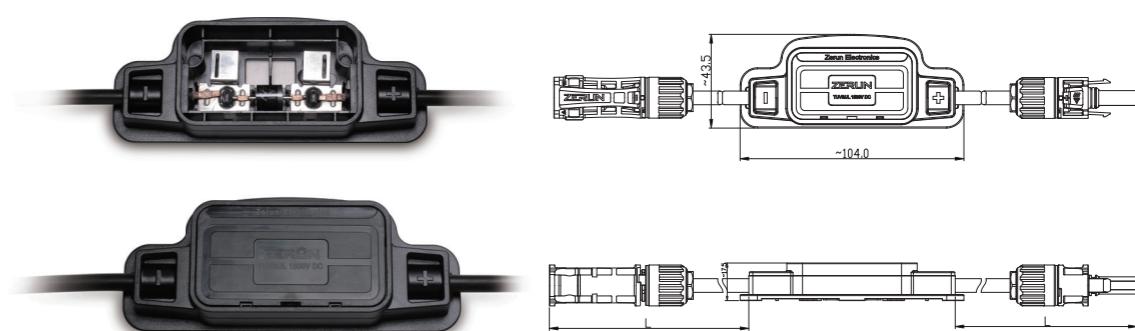

- 结构设计小巧，宽度20mm，适用于双面电池组件；
- 额定电流18A/20A/22A，适用于高效电池组件；
- 总灌胶量24ml，降低客户使用成本。
- Slim design for bifacial PV panel, width in 20mm.
- Rated Current 18A/20A/22A, benefits for high efficiency PV module.
- Potting volume 24ml, Lower potting compound cost for panel maker.

Z9 全灌封薄膜接线盒  
Potting thin-film junction box

- 结构设计美观小巧，可用于自动组装；
- 整体及匹配连接器电性能优良，整体阻抗大约11mΩ(1m&2.5mm<sup>2</sup>线材)，发热和功耗低；
- 符合IEC和UL最新标准双重测试，系统电压达到1500V DC。
- Mini size,slim, can be assembled onto module automatically.
- Loop resistance is about 11mΩ (Cable:1m&2.5mm<sup>2</sup>), low heat generation, low power consume.
- Pass IEC and UL test, system voltage 1500V DC.

- 特有的螺帽防松自锁结构，消除使用中出现的螺帽松动隐患；
- 符合IEC和UL最新安规要求，可与MC4类型连接器互配；(例如：MC4, H4, PV4等)
- 电气性能良好，接触阻抗小于 $0.3m\Omega$ ，发热低、功率损耗小。
- Unique design to eliminate the risk of nut loosening.
- Compatible with MC4 type connectors(MC4, H4, PV4 etc), TUV & UL certificated.
- Contact resistance less than  $0.3m\Omega$ , less heating and low power consume.

- 双层绝缘
- 电子束交联化合物
- 紫外线，水，臭氧，液，盐，一般耐候性极佳
- 极佳的耐磨性
- 无卤，阻燃，低毒
- 非常低排放的烟雾
- 出色的灵活性和剥离性能
- 线径从1.5平方毫米至10.0平方毫米
- Dual wall insulation
- Electron beam cross-linked
- Excellent resistance to UV, water, ozone, fluids, salt, general
- weathering
- Excellent resistance to abrasion
- Halogen free, flame retardant, low toxicity
- Very low smoke emissions
- Excellent flexibility and stripping performance
- Wire size from 1.5 mm<sup>2</sup>(16awg) up to 10.0 mm<sup>2</sup>(6awg)

| 材料特性     | Thermal and mechanical properties |   |
|----------|-----------------------------------|---|
| 环境温度     | Ambient temperature               | -40 ° C ... +90 ° C   |
| 导体最高工作温度 | Maximum conductor temperature     | max. +120 ° C   |
| 耐温       | Highly heat resistant             | -40 ° C ... +90 ° C (>150.000 小时 / hours)<br>-40 ° C ... +105 ° C (>70.000 小时 / hours)<br>-40 ° C ... +120 ° C (>20.000 小时 / hours) |
| 使用年限     | Expected usable life              | 25 年 / years  |
| 高机械应力    | Mechanically highly stressable    |   |
| 低温下具柔性   | Flexible at low temperatures      |   |
| 抗振动      | Abrasion resistance               | 很好 / Very good  |
| 抗拉强度     | Tensile strength                  | 18 N / mm <sup>2</sup>  |
| 伸长率      | Elongation at rupture             | 160%  |
| 硬度       | Hardness                          | 40 Shore D  |

| 耐候性   | Resistant to environmental influences                |   |

# TOOLS AND ACCESSORIES

## 工具及附件

Z4

连接器开锁和螺母扳手  
Unlocking and Tightening tool

Z5/Z7/Z8/Z9  
(FOR ZS/Z7/Z8/Z9)  
接线盒开盖工具  
Lid releasing tool

Z4S

连接器开锁和螺母扳手  
Unlocking and Tightening tool

Z3

连接器开锁和螺母扳手  
Unlocking and Tightening tool

冲压端子铆线钳

Crimping pliers for stamping terminals

适用于Z4和Z4S冲压端子  
( $2.5\text{mm}^2$  –  $6\text{mm}^2$ , 14–10awg)

For Z4 and Z4S stamping terminals  
( $2.5\text{mm}^2$  –  $6\text{mm}^2$ , 14–10awg)

车件端子铆线钳

Crimping pliers for machining terminals

适用于Z4和Z4S车件端子  
( $2.5\text{mm}^2$  –  $6\text{mm}^2$ , 14–10awg)

For Z4 and Z4S machining terminals  
( $2.5\text{mm}^2$  –  $6\text{mm}^2$ , 14–10awg)

剥线钳

Striping pliers

适用于线芯截面为  
 $2.5\text{mm}^2$  –  $6\text{mm}^2$  (14–10awg)的线材

For cable cross section  
 $2.5\text{mm}^2$  –  $6\text{mm}^2$  (14–10awg)

Z1系列透气膜  
Z1 series membrane

防尘帽

Dust cap

适用于Z4 & Z4S ( For Z4 & Z4S)

适用于Z3 ( For Z3)
